PMA2020/CÔTE D'IVOIRE

JULY-AUGUST 2018 (ROUND 2)

Performance Monitoring and Accountability 2020 (PMA2020) uses innovative mobile technology to support low-cost, rapid-turnaround surveys to monitor key indicators for family planning. The project is implemented by local universities and research organizations in 11 countries, deploying a cadre of female resident enumerators trained in mobile-assisted data collection.PMA2020/Côte d'Ivoire is led by the Institut National de la Statistique de la Côte d'Ivoire (INS-Côte d'Ivoire) and the Direction de Coordination du Programme National de Santé de la Mère et de l'Enfant (DC-PNSME) within the Ministry of Health. Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health though a grant from the Bill & Melinda Gates Foundation.

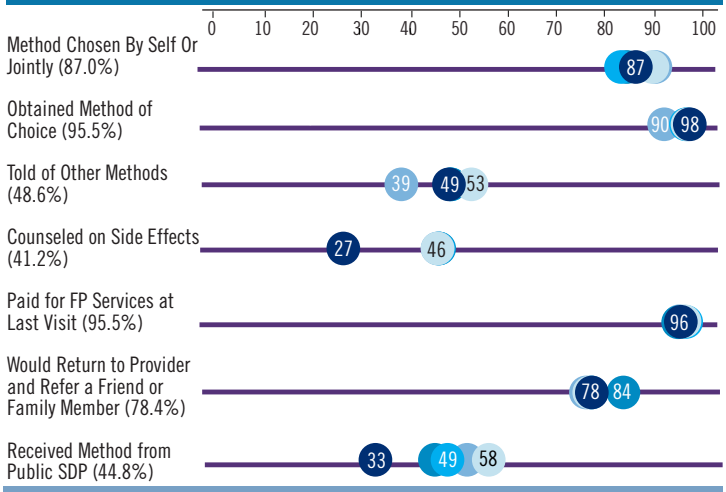
FAMILY PLANNING BRIEF

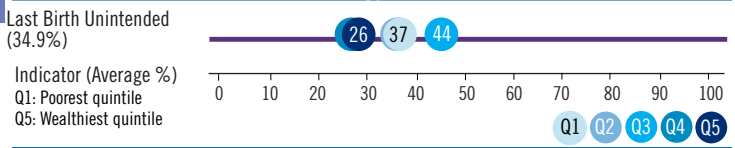
PMA2020/CÔTE D'IVOIRE (JULY-AUGUST 2018)

INDICATORS FOR ACCESS, EQUITY, QUALITY AND CHOICE

For Current Modern Users (%), Indicators by Wealth Quintiles

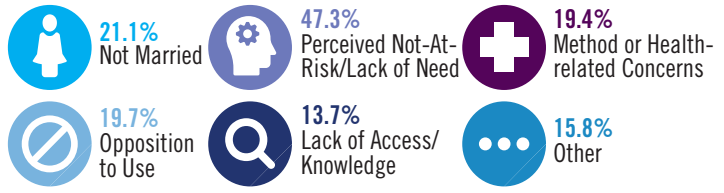


Births in the Past Five Years, or Current Pregnancies



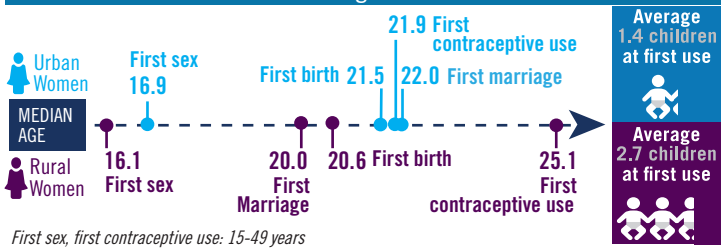
For Current Female Non-Users

Reasons Mentioned for Non-Use Among All Women Wanting to Delay the Next Birth Two or More Years (%)



**Respondents were able to select more than one answer*

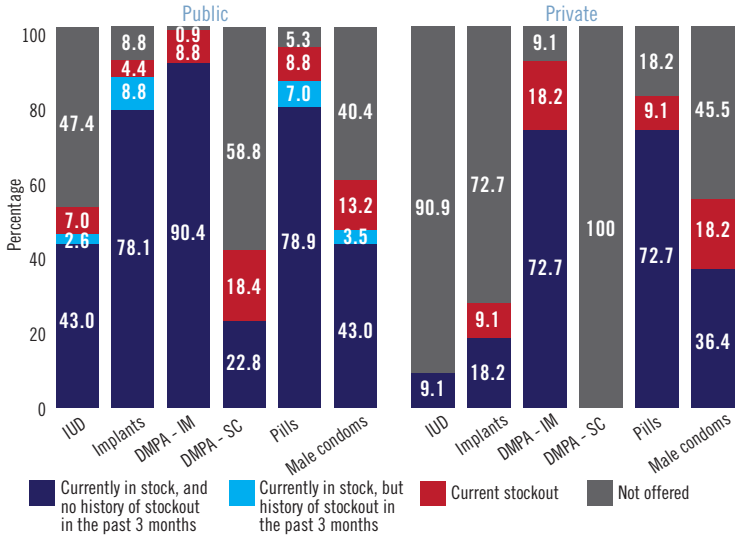
Reproductive Health and Contraceptive Indicators Among Women Ages 25-49



First sex, first contraceptive use: 15-49 years
First marriage, first birth: 25-49 years

	Total	Rural	Urban
Women Having First Birth by Age 18 (%) (18-24 years)	26.9	36.7	21.3
Received FP Info. From Provider in Last 12 Months (%) (15-49 years)	23.6	28.1	20.8
Exposed to FP Media in Last Few Months (%) (15-49 years)	58.9	49.1	64.9

Percent of Facilities Offering Family Planning with Methods in Stock on Day of Interview (n=125, 114 Public, 11 Private)



Percent of All Public Facilities With at Least 3 or 5 Modern Contraceptive Methods, by Facility Type

Facility Type	3 or more methods	5 or more methods
Hospital	89.6	56.2
Health Center	74.2	28.8
Total	81.0	40.5

Service Delivery Points

	Public	Private	Total
Among All Service Delivery Points:			
Offering Family Planning (%)	98.3	57.9	92.6
With Mobile Teams Visiting Facility In Last 6 Months (%)	17.2	0.0	14.8
Supporting CHWs from this Service Delivery Point (%)	22.4	10.5	20.7
Among Service Delivery Points Offering Family Planning Services:			
Average Number Of Days Per Week FP Is Offered	5.9	6.1	5.9
Offering Female Sterilization (%)	2.6	0.0	2.4
Offering FP Counseling/Services To Adolescents (%)	95.6	81.8	94.4
Charging General User Fees For FP Services (%)	13.2	9.1	12.8
Availability of Instruments or Supplies for Implant Insertion/Removal+ (%)	84.6	100.0	85.0
Availability of Instruments or Supplies for IUDs++	85.0	100.0	85.2

+Among SDPs that provide implants; includes: Clean Gloves, Antiseptic, Sterile Gauze Pad or Cotton Wool, Local Anesthetic, Sealed Implant Pack, Surgical Blade

++Among SDPs that provide IUDs; includes: Sponge-holding forceps, Speculums (large and medium), and Tenaculum

SAMPLE DESIGN

PMA2018/Côte d'Ivoire data provide representative estimates at the national and urban and rural level. A total of 73 enumerations areas (EAs) were selected by Côte d'Ivoire's National Statistics Institute, using probability proportional to size, from a sampling frame provided by the Fourth General Census of Population and Housing in 2014. Structures, households, and service delivery points (SDPs) were enumerated in each selected EA. Thirty-five households were selected randomly from each EA. All eligible women, aged 15 to 49, in the sampled households were contacted and consented for interviews. The SDP sample included three public SDPs that serve an EA and up to three private SDPs within the EA. Data collection occurred from July to August 2018. The final database included 2,425 household (98.1% response rate), 2,738 de facto women (98.1% response rate) and 135 SDPs (97.1% response rate), of which 116 are public.
