PERFORMANCE MONITORING & ACCOUNTABILITY 2020

PMA2020 is a five-year project that uses innovative mobile technology to support low-cost, rapid-turnaround, national-representative surveys to monitor key indicators for family planning. The project is implemented by local university and research organizations in ten countries, deploying a cadre of female resident enumerators trained in mobile-assisted data collection. PMA2020/Ghana is led by the Kwame Nkrumah University of Science and Technology (KNUST), School of Medical Sciences in collaboration with University of Development Studies (UDS) and with the support of the Ghana Health Service and Ghana Statistical Service. Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health though a grant from the Bill & Melinda Gates Foundation.

INDICATORS FOR ACCESS, EQUITY, QUALITY AND CHOICE

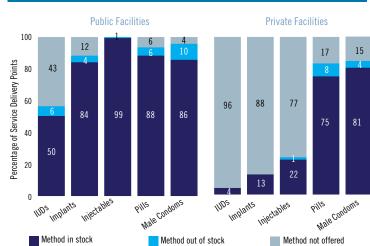

Reasons Mentioned For Non-Use Among All Women Wanting To Delay The Next Birth 2 Or More Years (%) Not Married 34.5 Perceived Not-At-Risk/Lack of Need 39.5 Method or Health-related Concerns 32.9 Opposition to Use 12.9 Lack of Access/Knowledge 6.4

For Current Female Non-Users (n=2,435):

For All Women of Reproductive Age, 15-49:				
	Total	Rural	Urban	
Median Age at First Marriage (25 to 49 years)	21.6	20.4	22.9	
Median Age at First Sex (25 to 49 years)	18.8	18.4	19.1	
Median Age at First Contraceptive Use	22.9	24.0	22.4	
Median Age at First Birth (25 to 49 years)	21.3	21.0	21.8	
Mean No. Of Living Children At First Contraceptive Use	1.6	2.0	1.3	
Women Having First Birth by Age 18 (18 to 24 years) (%)	8.1	10.6	6.3	
Received FP Info. From Provider In Last 12 Months (%)	24.2	31.3	19.4	
Exposed to FP Media in Last Few Months (%)	74.0	66.8	78.9	

Percent of Facilities Offering & Currently In/Out of Stock, by method

Percent of Public Facilities Offering at Least 3 or 5 Modern Contraceptive Methods, by Facility Type					
Facility Type	3 or more methods	5 or more methods			
Hospital (n=69)	98.6	92.8			
Health Center (n=51)	98.0	80.4			
Health Clinic (n=6)	100.0	100.0			
CHPS* (n=19)	78.9	57.9			
Other (n=1)	100.0	100.0			
Total	95.9	84.2			

^{*}CHPS: Community-Based Health Planning and Services

Service Delivery Points (n= 231; 144 public, 87 private)				
	Public	Private	Total	
Among All Service Delivery Points:				
Offering Family Planning (%)	99.3	82.8	93.1	
With Mobile Teams Visiting Facility In Last 12 Months (%)	37.0	4.6	24.9	
Supporting CHWs From This Service Delivery Point (%)	39.7	41.7	40.0	
Among Service Delivery Points Offering Family Planning Services:				
Average Number Of Days Per Week Family Planning Is Offered	5.6	6.0	5.9	
Offering Female Sterilization (%)	26.2	2.8	18.4	
Offering Family Planning Counseling/Services To Adolescents (%)	100.0	61.1	87.1	
Charging Fees For Family Planning Services (%)	89.0	44.8	72.5	
Percent Integrating Family Planning Into Their:				
Maternal Health Services (among all offering maternal health services)	99.3	63.6	94.3	
HIV Services (among all offering HIV services)	100.0	100.0	100.0	
Post-Abortion Services (among all offering post-abortion services)	99.0	71.4	95.6	

SAMPLE DESIGN

Other

PMA2014/Ghana-R3, the third round of data collection in Ghana, used a two-stage cluster design with urban-rural, major ecological zones as the strata. A sample of 100 enumeration areas (EA) was drawn by the Ghana Statistical Service from its master sampling frame. For each EA, 42 households and 3-6 health service delivery points (SDPs) were selected. A random start method was used to systematically select households. Households with eligible females of reproductive age (15-49) were contacted and consented for interviews. The final sample included 4,028 households, 4,567 females and 231 SDPs. Data collection was conducted between September and December, 2014.
