Performance Monitoring and Accountability 2020 (PMA2020) uses innovative mobile technology to support low-cost, rapid-turnaround surveys to monitor key indicators for family planning. The project is implemented by local universities and research organizations in 11 countries, deploying a cadre of female resident enumerators trained in mobile-assisted data collection. The first and third rounds of data collection in Niger were conducted exclusively in Niamey. The second and current (fourth) round of data collection were conducted at the national level. PMA2020/Niger is led by the Institut National de la Statistique (INS) in Niger. Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health through a grant from the Bill & Melinda Gates Foundation.

Public Service Delivery Points (n=121)

Among All Service Delivery Points:

Offering Family Planning (%) 94.2
Offering Female Sterilization (%) 2.6
Offering Family Planning Counseling/Services To Adolescents (%) 88.6
Charging General User Fees For Family Planning Services (%) 5.3
Availability of Instruments or Supplies for Implant Insertion/Removal (%) 73.4
Availability of Instruments or Supplies for IUDs** (%) 54.9

Among Service Delivery Points Offering Family Planning Services:

Average Number Of Days Per Week Family Planning Is Offered 6.5
Offering Female Sterilization (%) 2.6
Offering Family Planning Counseling/Services To Adolescents (%) 88.6
Charging General User Fees For Family Planning Services (%) 5.3
Availability of Instruments or Supplies for Implant Insertion/Removal (%) 73.4
Availability of Instruments or Supplies for IUDs** (%) 54.9

**Among SDPs that provide implants, includes: Clean Gloves, Antiseptic, Sterile Gauze Pad or Cotton Wool, Local Anesthetic, Sealed Implant Pack, Surgical Blade

**Among SDPs that provide IUDs, includes: Sponge-holding forceps, Speculums (large and medium), and Tenaculum

SAMPLE DESIGN

PMA2017/Niger data provide national estimates, as well as for Niamey, urban areas outside of Niamey, and rural areas. A total of 84 enumerations areas (EAs) (51 outside of and 33 within Niamey) were selected, using probability proportional to size, from a sampling frame provide by the Fourth General Census of Population and Housing, conducted by Niger’s National Statistics Institute in 2012. Structures, households, and service delivery points (SDPs) were enumerated in each selected EA. Thirty-five households were selected randomly from each EA. All eligible women, aged 15 to 49, in the sampled households were interviewed. SDP sample included three public SDPs that serve an EA and up to three private SDPs within the EA. Data collection occurred from May-September 2017. The final database included 2,784 household (98.2% response rate), 3,020 women (97.0% response rate) and 132 SDPs (96.4% response rate), of which 121 are public.
