

PMA2020/KADUNA, NIGERIA

APRIL-MAY 2018 (ROUND 5)

Performance Monitoring and Accountability 2020 (PMA2020) uses innovative mobile technology to support low-cost, rapid-turnaround surveys to monitor key indicators for family planning. The project is implemented by local universities and research organizations in 11 countries, deploying a cadre of female resident interviewers trained in mobile-assisted data collection. PMA2020/Nigeria is led by the Centre for Research, Evaluation Resources and Development (CERED) and Bayero University Kano (BUK). Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health through a grant by the Bill & Melinda Gates Foundation.

SAMPLE DESIGN

The PMA2018/Kaduna survey used a two-stage cluster design. The same sample from the previous round was used, 66 enumeration areas (EAs) drawn from the National Population Commission's master sampling frame. In each EA, households and private health facilities were listed and mapped, with 35 households randomly selected per cluster of EAs. Households were surveyed and occupants enumerated. All eligible females age 15 to 49 were contacted and consented for interviews. The final completed sample included 2,268 households (99.1% response rate), 2,766 de facto females (99.0% response rate) and 139 health facilities (100% response rate). Data collection was conducted between April and May 2018.
